PROFESSIONAL SUMMARY

Economics student (graduating February 2027) with two years of hands-on accounting experience and a solid foundation in financial analysis, SQL and Excel. Comfortable working with ledgers, business data and proprietary systems, and motivated to turn raw numbers into clear, actionable insights. Lifelong computer enthusiast with a passion for Linux and servers, who enjoys understanding how systems work under the hood. Looking for an entry-level Data Analyst role to grow in a data-driven team.

EDUCATION

University of the Peloponnese – Department of Economics *Expected graduation: February 2027*
Relevant Coursework: Financial Analysis, Microeconomics, Behavioral Economics, Business Strategy, Marketing, Entrepreneurship, Sustainability

EXPERIENCE

Assistant Accountant | Katsaitis Consulting S.A. *Jul 2023 – Sep 2025*

- Maintained accurate ledgers and financial records in Epsilon-Net ERP, supporting senior accountants on B2B accounts
- Investigated and resolved complex account discrepancies, tracing errors back to their source in the data
- Processed high volumes of data across proprietary software systems, with exposure to internal IT infrastructure
- Served B2C clients and coordinated with external partners to ensure timely delivery of documents and information

SKILLS

Data & Analysis: SQL (MySQL), Microsoft Excel, financial analysis
Accounting: Bookkeeping, B2B Account Management, General Ledger Maintenance
Business Systems: Epsilon-Net (Accounting ERP)
Tools & AI: Git/GitHub, Google Workspace, Notion, Obsidian, Canvas, LLMs (Gemini, NotebookLM)
Soft Skills: Analytical thinking, communication, teamwork, self-management, research, consulting
Languages: Greek (native), English (Michigan Lower Certificate, B2)

TECHNICAL INTERESTS

- **Linux & Servers:** Passionate about Linux, server administration and open-source software; I enjoy tinkering with systems and learning how things work behind the scenes

PROJECTS & ACTIVITIES

Creator & Developer | ProjectOS (Open-Source) *2026 – Present*

- Building an open-source project management app that helps small and medium business owners manage finances, to-do lists, CRM and projects in one place
- Acting as my own client: defining business requirements, then using the app's economic data to practise real-world data analysis
- Maintain the application code on the main branch and the economic data analysis on a separate branch of the public repository, applying Git version control

Founder & Administrator | Project-Net *Nov 2025 – Present*

- Founded and run a cross-functional hub that connects motivated young people with opportunities to build real professional experience
- Lead team coordination, project planning and external communication strategy
- Built a community-service culture that encourages members to contribute and learn together

Uni-start Hackathon: Developed a business model prototype and pitched it to a panel of judges

Google Academy – Gemini & NotebookLM Webinar: Completed training on using generative AI for research, analysis and strategic ideation
